

500 SERIES CRYSTALLINE

Distinctive, quality lighting combining the elegance of crystalline acrylic with the efficiency of the new energy efficient lamps. Bright, evenly distributed illumination, highlighted by white antique bronze or polished brass finish, distributes the light of both circleline and miniature twin tube lamps. A dignified lighting source for halls, foyers or powder rooms.

Dimensional Data:

Specifications:

Mounting: Back plate provided with adequate knock-outs and mounting holes for either wall or ceiling installation.

Construction: All metal parts are die formed from heavy gauge cold rolled steel.

Diffuser: Handsome clear acrylic which simulates cut crystal glass.

Wiring: Circleline ballasts are ETL-CBM, Class P 120 volt. All PL ballast normal power factor. High power factor ballast available upon request.

Approval: All units are Underwriter's Laboratories (UL) approved.
